

Registered Nurse (RN)

OnSite Health LLC - Chicago, IL 60640

Looking for a change of pace, with more traditional daytime hours and less stressful, more independent nursing? Onsite Health, LLC, a highly-regarded workplace healthcare provider, seeks an energetic RN for part-time nursing (which can evolve into full-time nursing if interested) to provide customized employee health, safety, and well-being, services to the staff of a healthcare employer in Chicago.

Onsite Health is an occupational healthcare staffing agency who specializes in providing on-site, proactive, high-quality, compassionate workplace healthcare services. Onsite Health is seeking experienced and reliable healthcare professionals who can thrive independently and who are committed to educating and serving our clients.

Position Summary

We are seeking an RN in Chicago who can work independently using critical thinking skills. Phlebotomy experience is helpful, and a 'patient-advocate' mentality, organizational and tech skills, and exceptional reliability are keys to the position. Ability to adjust and adapt easily to a changing work environment and communication and documentation skills are essential, along with an outgoing and positive attitude. Our nurses have a passion for educating clients and helping them to improve their quality of life. To be a part of our team, you must have an excellent work ethic and the desire to improve your knowledge and skills over time.

Primary Job Responsibilities

- Development of employee health program including but not limited to written policies and standard operating procedures
- Perform employee health compliance risk assessment and provide recommendations, action and implementation plans
- Develop and provide employee health training plan
- Identification of those employees that need training, i.e. bloodborne pathogen training
- Responsible for required health testing of employees, i.e. respirator fit testing, TB
- Manage and perform routine vaccination programs, i.e. Flu, COVID-19
- Keep all staff health records on OnSite Health Data System (OHDS)
- Keep record of COVID-19 vaccination status on OHDS
- COVID-19 return to work management as needed
- Report employee health data to HR
- Present health education to groups as requested
- Perform other related nursing tasks as required by client
